

# COVER YOURSELF FOR SUMMER

SUMMER CATALOG 2024

# EFFECTIVE SUN PROTECTION

A 2020 study on Sustainable Solutions to Mitigate Occupational Heat Strain found that one of the most effective solutions at mitigating occupational heat strain was wearing specialized cooling garments. The main barrier of use they found for specialized cooling garments was pricing, and at OccuNomix we offer a wide range of cooling tech at affordable prices to keep you cool on just about any job this summer.

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC7487490/>

## “ WATER. REST. SHADE. ”

It's OSHA and NIOSH's message to help you prevent heat related illness and protect yourself against the cruel summer sun.

# DID YOU KNOW?

244 people died in 2023 as a result of a heat wave. This Heat Wave that mostly affected the Southern/Midwestern US lasted 6 months - that's half the year with record high temperatures and drought. **OccuNomix has you covered** for 2024, helping to make sure any record high temps give you record low problems.

<https://www.ncei.noaa.gov/access/billions/>

## WHAT IS HEAT STRESS?

Heat stress occurs when the body overheats from external or internal sources. The body uses breathing, sweating and blood flow to regulate heat, but it can still lead to heat-related illnesses. Heat exhaustion, cramps, fainting and heat stroke are possible. Working in hot conditions can lower productivity and harm workers' health.

Preventing heat stress protects workers' safety, health and productivity. Trust OccuNomix to make that simple for you.

## HIGH RISK INDUSTRIES

Many occupations require workers to be exposed to environments of high heat. Unfortunately, "every year thousands of workers become sick from occupational heat exposure, and some are fatally injured (osha.gov)".

- Construction
- Road Work
- Demolition
- Iron/Steel Work
- Oil Rigging
- Drilling/Mining
- Roofing
- Manufacturing
- Automotive
- Waste Hauling
- Landscaping

## HEAT-RELATED ILLNESSES

**Heat Rash:** Red Clusters of pimples or small blisters

**Heat Cramps:** Muscle Cramps, pain, or spasms in the abdomen, arms or legs

**Heat Exhaustion:** Headache, heavy sweating, extreme weakness and fatigue, dizziness, nausea, vomiting, irritability, fast, shallow breathing and rapid heartbeat, slightly elevated body temperature

**Heat Stroke:** Confusion, seizures, coma, high body temperature, hot, dry skin or profuse sweating, throbbing headache

## HEAT STROKE:

Heat Stroke is the most serious heat related health problem and happens when the body's temperature regulation system fails, forcing the body temperature to rise to critical levels. This can lead to disability or death.

## WHAT YOU NEED TO DO:

- Seek **immediate** medical assistance
- Move worker to a cool, shaded area
- Make sure someone stays with worker until help arrives
- Wet clothing with cool water and circulate the air to speed cooling

## PREVENTION TIPS

- Most Important; drink plenty of fluids (8oz every 15-20 minutes during moderate activity in moderate heat)
- Acclimatize workers
- Set up a buddy system
- Schedule regular rest breaks
- **Emphasize the need for appropriate clothing/PPE**
- Avoid beverages that contain alcohol, soda, caffeine or other diuretics
- **Wear loose-fitting lightweight, light-colored clothing**
- **Wear headgear that provides shade**
- Take 10-15 minute breaks every 2 hours
- **Use personal cooling devices, such as cooling vests and or accessories**

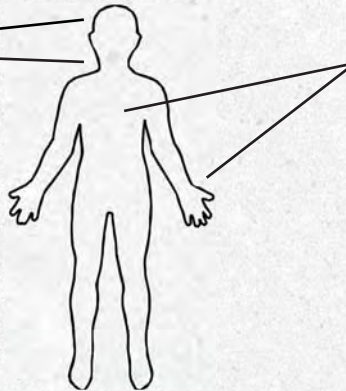

## PROTECTING YOU

The ISEA proposed an A10.50 heat management standard, which establishes the minimum requirements for the prevention of heat illnesses and management of heat stress hazards encountered during construction and demolition operations.

Choosing the right PPE for your needs is important for staying cool while you work in dangerously warm environments.

# DON'T THROW SHADE, WEAR IT!

Ever been labelled the worksite grouch during summer's sizzling days? Feeling prickly when the sun turns up the heat is more common than you'd think! The struggle is real when the sun decides to turn the world into its personal oven. But, hey, it's not just about escaping the sweaty discomfort, it's about playing a long-term game called 'dodge the sunburn'. Don your sun-armor, folks, because keeping your cool when the mercury rises is more than just about comfort - it's about your long-term health!

Did you know that **skin cancer is the most common cancer in the US**, with about 1 in 5 Americans developing it in their lifetime? In fact, every day, approximately 9500 people in the US are diagnosed with skin cancer.

MORE THAN  
**1 IN 5**  
AMERICANS  
WILL DEVELOP  
SKIN CANCER

The American Cancer Society reveals that over **3 million people are diagnosed with skin cancer every year**. A significant contributor to this is exposure to UV radiation, which is implicated in about 65% of melanoma cases and 90% of non-melanoma skin cancers, according to the National Library of Medicine.

So, as you gear up for work in the sun, **remember to prioritize shade and UV protection**. It's more than just comfort, it's a matter of health and safety.

# SHADE FOR HEAD, NECK, & EARS

Looking for comprehensive sun protection? The CDC suggests a full brimmed hat to shield your face, ears, and neck. OccuNomix brings you the solution, offering hats and shades designed to cover all these crucial areas. Don't forget, this is an addition to your regular sunscreen application for a well-rounded sun defense strategy. Trust OccuNomix for genuine and effective sun protection.

## BUILT IN UV PROTECTION

When it comes to working under the sun, protecting your skin is essential. That's where our OccuNomix high visibility t-shirts prove their worth. Made from lightweight yet hardwearing Polyester Birdseye, these shirts not only provide a comfortable fit, but they also manage sweat to keep you cool. The top-notch feature? With UPF 30 protection, these tee's perform the role of your personal UV shield. It's not just a t-shirt, it's your personal shield against the sun. With OccuNomix, rest assured your skin is under the best protection!

# YOUR GUIDE TO COOL

For over 35 years, MiraCool® has been known for the best in evaporative cooling. We offer traditional polymer crystal, PVA, and MiraCool HyperKewl™ technologies with lightweight, super-absorbent materials. Our perspiration management products provide thermoregulation through UPF sun protection, wicking, and evaporative cooling.

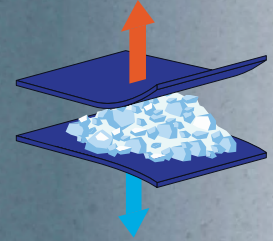

## MIRACOOOL® TECHNOLOGIES

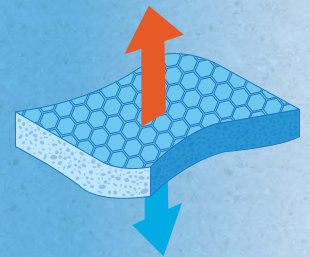

### POLYMER CRYSTALS

- Over 35 years of proven cooling
- Crystal polymers plump with water
- Activates in under 15 minutes
- Designed for quality, not slime
- Triple washed to avoid bleeding or staining

### POLY VINYL ACETAL

- Super absorbent, durable, lightweight material
- Feels drier to touch
- Honeycomb texture on one side perfect for wiping down
- Activates in one minute
- Designed for 100% evaporative power (no fabric-cover-up)
- Anti-mold & UPF 50+

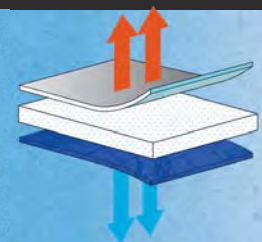

### INHERENT COOLING

- Cooling without chemicals
- Wicks and cools - with or without water
- Twist when wet to activate
- 23% more cooling power than microfiber
- Keeps Skin up to 30% Cooler when wet
- Anti-mold & UPF 50+

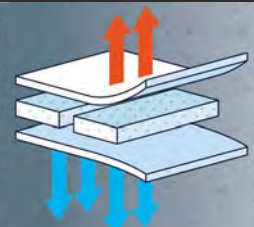

### MIRACOOOL HYPERKEWL™

- Made from MiraCool HyperKewl™ fabric that absorbs and slowly releases water
- Soak in water for 1-3 minutes to activate
- Up to 10 hours of cooling relief per soaking
- Reusable and easy to recharge

### PHASE CHANGE COOLING

- Provides cooling of 58°F/14°C
- Up to 3 hours of cooling per activation
- Reusable and easy to recharge
- Works in all temperatures & all humidity levels

# LIGHTWEIGHT PROTECTION FROM THE SUN

Cover yourself this summer with lightweight sun protection. Our loose-fitting 3.8 oz Wicking Birdseye Polyester T-Shirts are comfortable and perfect for hot days. Not only do they keep you cool, but they also provide UPF 30 protection from the sun's harmful rays. Our T-Shirts are the softest and most comfortable high visibility shirts in the industry, with no scratchy feeling on your skin. Additionally, they are durable and long lasting with heat-sealed reflective tape that won't peel off.

# 3.8 OZ WICKING BIRDSEYE

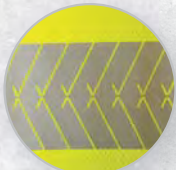

Are you wearing cooling sleeves with your short-sleeved shirt for additional protection from the sun? We have a great 2-in-1 solution for you! Our long-sleeved high-visibility T-shirts are lightweight, breathable, and wick away sweat to keep you comfortable. They provide UPF 30 protection from the sun's harmful UV rays, and best of all, you can save up to 9% by purchasing one long-sleeved shirt instead of both a short-sleeved shirt and cooling sleeves.

# FLAME RESISTANT

## STANDARDS MADE SIMPLE

### ANSI/ISEA 107 Standard

Since 1999, the standard has been recognized by federal, state and local authorities as well as private industry and provides performance criteria for materials used, specifies minimum areas and recommends placement of the materials. The standard's performance requirements focus on color and brightness of garments relative to the work environment and the combined use of fluorescent and retroreflective materials to make a person conspicuous in all light conditions, day and night. ANSI/ISEA 107 includes criteria for flame resistance (FR) as an optional feature of high-visibility personal protective equipment. High-visibility apparel marked as FR must be certified as complying with one of the FR tests cited in the standard.

### ASTM F1506 and NFPA 70E Standards

Garments that meet these standards are ideal for workers exposed to momentary electrical arc and related thermal hazards. Applications: Utility workers, Welders, First responders, Railroad workers, Oil & Gas workers

### NFPA 2112 Standard

Protection against flash fire. Garments that meet this standard are made from UL approved components. The garment itself must be UL approved - if not the garment is not NFPA compliant! Applications: Electrical, Utility and Oil & Gas to name a few.

### ASTM F1891 Standard

Electrical Arc specific to FR rainwear

### ASTM F2733 Standard

Protection against Flame Hazards (i.e. flash fire) specific to FR rainwear

## GREAT BALL OF FIRE

When the sun challenges you to a high-noon showdown, it's time to unleash your secret weapon of chill. With OccuNomix FR cooling and shade products, you can throw some shade back at the sun and claim the day. That's not just a victory, it's a breezy triumph!

# FLAME RESISTANT

We have you covered with our high visibility cooling PPE, keeping you cool and safe with FR treated fabric.

# SUSTAINABLE WORKWEAR

Next Generation Hi-Visibility Vests and Shirts Made From Recycled Materials

If you could buy high viz apparel that required 79% less energy to make, why wouldn't you?

- OccuNomix Sustainable Safety Products are made from recycled PET bottles that take 79% less energy to produce than from raw materials. [1]
- OccuNomix Sustainable Safety Products are all made with a minimum of 12 recycled bottles each, which means producing 1 garment alone saves enough energy to power a laptop for at least 30 hours! [2]
- OccuNomix Sustainable Safety Products creates an alternative for the 91% PET bottles that end up in our landfills. [3]

**WE NEVER COMPROMISE ON FABRIC QUALITY.**

**Our recycled fabrics are lightweight, soft, comfortable, & sustainable!**
